ABOUT ME

Flutter Engineer with 3.4 years of experience in fintech and cross-platform mobile development, specializing in scalable mobile systems, real-time architectures, and performance optimization. Delivered 160+ white-label Flutter app deployments and supported applications serving 10K+ active users with optimized UI, low-latency systems, and reliable production releases.

SKILLS

- **Core:** Flutter, Dart, Clean Architecture, Provider, BLoC, Riverpod
 - **Mobile & Desktop:** Android, iOS, Windows, macOS
 - **Native Integration:** Swift, Kotlin, Platform Channels, Native Modules
 - **APIs & Real-time:** REST API, JSON, WebSockets, InAppWebView
 - **Firebase:** Authentication, Cloud Messaging, Analytics, Crashlytics
 - **Storage & Offline:** SQLite, SharedPreferences, Secure Storage, Offline Sync
 - **Web & Backend:** HTML, CSS, JavaScript, PHP
 - **Maps & Device Features:** Google Maps, Geolocation, QR Scanning, Push Notifications
 - **Performance & Security:** Isolates, App Optimization, Token Handling, Role-Based Access
 - **Deployment:** Play Console, App Store Connect, CI/CD, GitHub Actions
 - **AI Tools:** Cursor, GitHub Copilot, Claude, Codex, OpenRouter, Kira, Antigravity
 - **Tools:** VS Code, Android Studio, Xcode, Postman, Git, Bitbucket
 - **Testing & Quality:** Unit Testing, Widget Testing, Debugging, Code Review
 - **Architecture:** MVVM, Repository Pattern, Dependency Injection
 - **Networking:** Dio, HTTP, API Error Handling, Interceptors
 - **UI/UX:** Responsive UI, Adaptive Layouts, Custom Widgets
 - **Release:** App Versioning, Build Flavors, Production Debugging
-

WORK EXPERIENCE

Flutter Developer

Appteq Technology Solutions | Feb 2023 – Present

- Delivered cross-platform Flutter applications across Android, iOS, Windows, and macOS with production-scale deployments.
- Integrated RESTful APIs, JSON data handling, WebSockets, and real-time communication.
- Implemented Firebase services including Authentication, Cloud Messaging, Analytics, Crashlytics, and subscriptions.
- Integrated Google Maps, geolocation tracking, and location-based service integrations.
- Built offline-first features using SQLite with background data synchronization.
- Created and managed Google Play Console and Apple App Store Connect accounts, handling app signing, store listings, and production releases.

- Improved application load time by 20% through widget optimization and image caching.
- Reduced API latency by 40%.
- Reduced crash rates using Firebase Crashlytics and proactive monitoring.
- Supported applications with 10k+ active users across multiple production releases.
- Enforced mobile security best practices including secure storage, API token handling, and role-based access control.
- Actively involved in architectural decisions, code reviews, and performance optimization.

KEY PROJECTS

Trading Application – XtremeNext

White-label trading platform supporting forex, cryptocurrency, and multiple trading instruments, delivered as 160+ customized applications.

- Designed, developed, and delivered a cross-platform app using Flutter.
- Integrated InAppWebView, WebSockets, and localhost server for real-time data flow.
- Handled charting integration, order flow, and core trading logic with flutter isolates.
- Customized highly responsive, pixel-perfect Flutter UIs and features per client requirements.
- Ensured scalability, performance, and reliability across multiple deployments.
- Supported deployment, maintenance, and post-release upgrades.

Blutasker (Urban Company-like Service App)

A cross-platform service booking platform enabling customers to hire professionals by posting tasks.

- Integrated push notifications, image compression & upload, voice recording.
- Implemented payment flow using InAppWebView with two-way communication.
- Built reusable UI components ensuring clean and scalable code.
- Delivered polished UI/UX ensuring performance across iOS & Android.

Pole-Vault (Smart Pole Installation App)

A smart field-activity mobile app for registering poles via QR scanning.

- Built QR-based pole registration workflow.
- Implemented offline mode & syncing using SQLite.
- Captured geolocation, photos, and field details.
- Designed reporting screens for tracking installed poles.
- Integrated deep-link-only secure access.

EHS SafetyData (Safety Data Sheets App)

A mobile application that provides searchable Safety Data Sheets.

- Developed a secure authentication system using Google Sign-In.
- Integrated a payment gateway using in-app web handling.
- Enabled real-time content rendering between web and mobile.
- Designed login-free browsing with controlled gated content.
- Built cross-platform solution for Android & iOS using Flutter.

Internal Platform Monitoring & Management App

A secure internal desktop application for macOS and Windows to monitor platform health, security, and operational metrics.

- Developed a secure login-based internal application for monitoring platform health and operational status.
- Designed and developed the backend services using PHP, handling authentication, data processing, and system integrations.
- Implemented real-time tracking of platform status, SSL certificate expiration, and system availability.

- Integrated database backup monitoring to ensure data integrity and timely backup validation.
 - Implemented centralized log monitoring to track system events, errors, and application activity.
 - Designed role-based access control to ensure secure and authorized platform usage.
-

LEADERSHIP & ACTIVITIES

- **Captain – Office Cricket B-Team** : Led cross-functional team members, coordinated matches and schedules, and promoted collaboration, accountability, and strong team morale.
 - **President – Brahmos House, College** : Led student teams, organized academic and cultural events, coordinated with faculty, and managed leadership responsibilities with accountability.
-

AWARDS & RECOGNITION

Rising Star of the Year 2024 – Appteq Technology Solutions

Earned company-wide recognition for rapid growth, technical excellence, and strong contribution to cross-platform Flutter projects.

Problem Solver Extraordinaire of the Year 2024 – Appteq Technology Solutions

Honored with company-wide recognition for consistently resolving complex technical challenges, optimizing performance, and delivering reliable solutions.

EDUCATION

Bachelor of Engineering in Computer Science

Jansons Institute Of Technology, Coimbatore | 2019 - 2023 - 80.60%

Higher Secondary Education

Vigneshwara Vidyalaya Matric Higher Secondary School | 2018-2019 - 62.67%
