ABOUT ME

Senior Flutter Engineer specializing in scalable mobile systems, real-time architectures, and performance optimization. Proven experience delivering 160+ production apps and handling 10K+ active users with optimized UI and low-latency systems.

SKILLS

- Advanced Flutter and Dart programming
 - Cross-platform clean architecture design
 - State management - Provider
 - REST API, Firebase, WebSockets
 - CI/CD, GitHub Actions
 - Native module integration (Swift, Kotlin)
 - Firebase Push Notification, Crashlytics
 - Performance optimization, profiling, testing
 - Problem-solving and analytical thinking
 - Team leadership and mentoring
 - Play Store & App Store Connect publishing with store compliance and release management
 - HTML, CSS, PHP
-

DEVELOPMENT TOOLS & PLATFORMS

- Visual Studio Code
 - Android Studio
 - Xcode
 - Postman
 - Git
 - Bitbucket
 - Slack
 - Plesk
-

EDUCATION

Bachelor of Engineering, Major in Computer Science

Jansons Institute Of Technology, Coimbatore | 2019 - 2023 - 80.60%

President - Brahmos House in college: Led student teams, organized academic and cultural events, coordinated with faculty, and managed responsibilities requiring leadership and accountability.

Higher Secondary Graduate

Vigneshwara Vidyalaiya Matric Higher Sec School | 2018-2019 - 62.67%

WORK EXPERIENCE

Appteq Technology Solutions | Feb 2023 – Present

Flutter Developer

- Delivered cross-platform Flutter applications across Android, iOS, Windows, and macOS with production-scale deployments.
- Integrated RESTful APIs, JSON data handling, WebSockets, and real-time communication
- Implemented Firebase services including Authentication, Cloud Messaging, Analytics, Crashlytics, and subscriptions.
- Worked with Google Maps, geolocation tracking, and location-based service integrations.
- Built offline-first features using SQLite with background data synchronization.
- Created and managed Google Play Console and Apple App Store Connect accounts, handling app signing, store listings, and production releases.
- Managed end-to-end app publishing lifecycle including internal testing, release tracks, compliance, and post-release updates.
- Improved application load time by 20% through widget optimization, image caching and Reduced API latency by 40%.
- Reduced crash rates using Firebase Crashlytics and proactive monitoring.
- Supported applications with 10k+ active users across multiple production releases.
- Followed mobile security best practices including secure storage, API token handling, and role-based access control.
- Actively involved in architectural decisions, code reviews, and performance optimization.
- Expert use of Git for version control, branching strategies, pull requests, and team collaboration.

KEY PROJECTS

Trading Application – XtremeNext

A cross-platform white-label trading application supporting forex, cryptocurrency, and multiple trading instruments, with delivery of 160+ customized applications.

- Designed, developed, and delivered a cross-platform trading app using Flutter.
- Integrated InAppWebView, WebSockets, and localhost server for real-time data flow.
- Handled charting integration, order flow, and core trading logic.
- Customized highly responsive, pixel-perfect Flutter UIs and features per client requirements.
- Ensured scalability, performance, and reliability across multiple deployments.
- Supported deployment, maintenance, and post-release upgrades.

Blutasker (Urban Company-like Service App)

A cross-platform service booking platform enabling customers to hire professionals by posting tasks.

- Integrated push notifications, image compression & upload, voice recording.
- Implemented payment flow using InAppWebView with two-way communication.
- Built reusable UI components ensuring clean and scalable code.
- Delivered polished UI/UX ensuring performance across iOS & Android.

Pole-Vault (Smart Pole Installation App)

A smart field-activity mobile app for registering poles via QR scanning.

- Built QR-based pole registration workflow.
- Implemented offline mode & syncing using SQLite.
- Captured geolocation, photos, and field details.
- Designed reporting screens for tracking installed poles.
- Integrated deep-link-only secure access.

EHS SafetyData (Safety Data Sheets App)

A mobile application that provides searchable Safety Data Sheets.

- Developed a secure authentication system using Google Sign-In
- Integrated a payment gateway using in-app web handling.
- Enabled real-time content rendering between web and mobile.
- Designed login-free browsing with controlled gated content.
- Built cross-platform solution for Android & iOS using Flutter.

Internal Platform Monitoring & Management App

A secure internal desktop application for macOS and Windows to monitor platform health, security, and operational metrics

- Developed a secure login-based internal application for monitoring platform health and operational status.
- Designed and developed the backend services using PHP, handling authentication, data processing, and system integrations.
- Implemented real-time tracking of platform status, SSL certificate expiration, and system availability.
- Integrated database backup monitoring to ensure data integrity and timely backup validation.
- Built modules to manage trading swaps, referral configurations, and related operational parameters.
- Implemented centralized log monitoring to track system events, errors, and application activity.
- Designed role-based access control to ensure secure and authorized platform usage.

LEADERSHIP & ACTIVITIES

Captain – Office Cricket Team

- Led cross-functional team members, fostering collaboration, accountability, and strong team morale.
- Coordinated matches and schedules while balancing professional responsibilities.

AWARDS & RECOGNITION

Rising Star of the Year 2024 – Appteq Technology Solutions

Recognized for rapid growth, technical excellence, and strong contribution to cross-platform Flutter projects.

Problem Solver Extraordinaire of the Year 2024 – Appteq Technology Solutions

Awarded for consistently resolving complex technical challenges, optimizing performance, and delivering reliable solutions.
